What *Factors* are considered for my presentation?

Timing & Motion

Motion of words, graphics and images add flare and distinction to each presentation. The timing involved in providing a smooth transition must be approached with exact detail.

Sound & Graphics

Original music and clip-sounds can be incorporated & timed into the prologue, epilogue, body of the presentation and/or the intermission period for a truly professional quality show.

Materials

Charts, graphs, organization charts and graphics that cannot be sourced or scanned will need to be recreated. Each adds to the sophistication of the presentation, as well as the time involved to design according to specification.

Deliverables

- Digital presentation file
- CD Rom
- “Instructions for Your New Presentation”
 - Directions for Loading
 - Directions for Viewing
 - Directions for Hiding Slides & Customizing
